

AUTOMATIC SERIES

BROUWER

4000-24R

THE TITAN OF TURF | A GOLIATH IN THE FIELD

Simple, compact, & maneuverable, the AWD 4000-R Automatic Roll Sod Harvester with traction control has a tight turning radius and easy back up capability combined with a simple & reliable robotic stacking system that requires little maintenance. The 4000-R boasts a deluxe OEM cab including sightline cameras, joystick with finger tip controls, tinted windows, interior climate control and additional training seat, proving our commitment to your business performance.

LOW MAINTENANCE CONSISTENT CUT | SIMPLE SOFTWARE. EASY SERVICE

Easy to operate and maintain without sacrificing comfort, the Brouwer 4000-R is a cut above the rest. The streamlined cost-effective software powers the auto drive control, maintaining harvesting ground speeds while the electronic auto steer continuously makes micro adjustments keeping a straight cut every time. Combined with our advanced cutting head with 2 roller adjustable down pressure, the 4000-R was designed for easy maintenance and low OEM parts costs via our global dealer network.

I READY TO ROLL IN ANY CONDITION

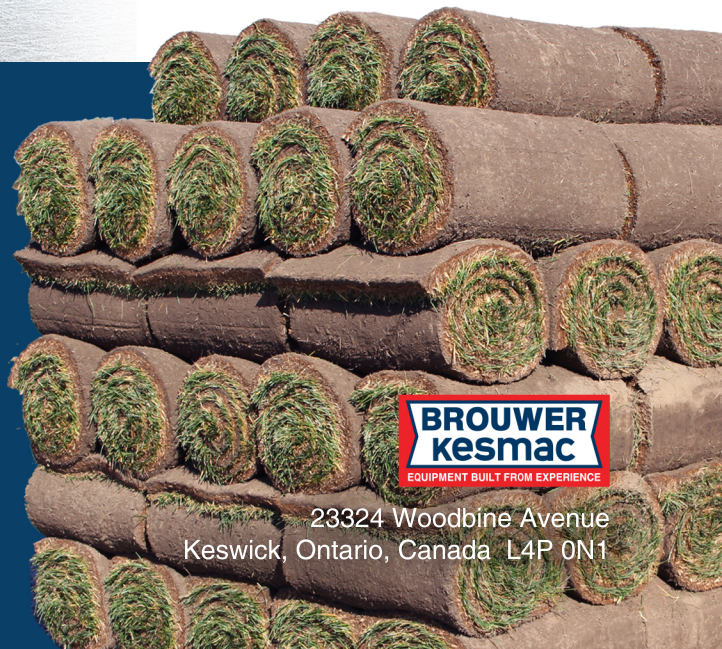

REMOTE BROUWER TELEMATICS

Our harvesters have proven that they can cut in even the most extreme condition and it's our mission to keep you cutting no matter the circumstance. Brouwer Telematics allows for remote diagnostics, updates, adjustments and monitoring utilizing GSM/GPS communication, to ensure you don't experience interruptions in your harvesting production.

10 PRESET STACK CONFIGURATIONS | 16", 23" & 24" CUTTING WIDTHS

The adjustable pallet injector can stack up to 18 pallets of various sizes and accommodate extra thick double-sided pallets. With adjustable stacking pressure, up to 5 rolls of turf are transferred to the rear mounted pallets and stacked in both flat or pyramid tops while the automatic flap control maintains roll & flap position. Pallets may be dropped on the go or easily backed out of the way of the cut line for multi-machine operations.
