MONUMENT SETTER

MONUMENT SETTER

**BROUWER
kesmac**

SMOOTH AND QUIET OPERATION, SETTING MONUMENTAL STANDARDS ACROSS THE GLOBE.

The BROUWER MONUMENT SETTER is a unique tool for transporting and setting monuments in a wide variety of conditions. The compact size and variable hydrostatic drive allows the machine to navigate into tight spots. The outrigger design allows for large monuments and bases to be set easily and safely by a single operator. The controls are easy to use and the proportional valves of the crane allow for gentle monument setting. The 13 hp Honda Engine, with Electric Start, provides smooth and quiet operation, with sufficient power for slopes and heavy loads.

- Pivoting rear dual wheel steering means minimal turf damage or scuffing, excellent maneuverability
- Installs monuments quickly and precisely
- The Crane hydraulic system has proportional valves for exact control of monument placement
 - Durable heavy steel frame
 - Easy to operate
 - Hydrostatic transmission
 - Easily transportable
