**RUGGED TUBE WELD DESIGN FOR DURABILITY AND CUT
CONSISTENCY ON LONG BUSY DAYS IN THE FIELD.**

Using only a 45 hp tractor, these units can mow up to 160 acres per day. A key feature is the mower's transportability. Fingertip hydraulic controls allow the operator to lift the mower frames for easy transport with a small transport width. This mower is designed especially for large turf areas. The scissor like cut promotes health and growth of the turf. The transportable fairway reel was specifically designed for the turf industry to accommodate low mowing heights and contoured terrains.

Available in 5, 7, 9 or 11 gang models for mowing 25 ft. widths with 5 to 9 blade reels.

FEATURES:

- Cut from ½ inch to 3 ¼ inches with minimum turf stress
- Delivers great cut even in wet or rainy conditions
- Floating head follows contours for low mow heights
- Single point adjustment for operator simplicity
- Improved reel design for good clipping flow
- High flotation for reduced compaction
- Heavy bed-knife holder and reel frame
- Available in 5, 6, 7, 8, and 9 bladed reels.
- Easy reel and mowing height adjustment
- Easy to operate and maintain & transport
- Rugged tubular frame design

BENEFITS:

- Promotes healthy grass and faster maturity
- Scissor-like cut is better for your turf
- Mows up to 160 acres per day
- Low horsepower required
