MAXIMIZE YOUR HARVEST |

THE RELENTLESS ROBOMAX JD
POWERED BY A JOHN DEERE 6130M

This state of the art automatic sod harvester comes standard with 4WD & traction control to tackle all conditions including tender and wet turf. The advanced electric Auto-steer makes micro adjustments while the hydraulic cutting head with adjustable down pressure makes precise cuts with consistent placement and proven automatic flap control. Combined with the patented Brouwer gripper head with squeeze function for fine tune stacking adjustments, the RoboMax JD produces a clean pallet every time.

DELUXE CAB & EASY OPERATION | FINGERTIP CONTROLS POWERED BY REFINED SOFTWARE.

Highly maneuverable and easy to operate without sacrificing comfort, the RoboMax JD with streamlined cost-effective software and diagnostics is always ready when you need it. The deluxe climate controlled cab with fingertip controls has 360 cab lighting as well as LED conveyor and pilling area flood lights. To take your product to the next level, Brouwer also offers an optional powered brush kit for debris and clippings removal while the additional front ground roller option helps keep cutting pressure consistent in soft or tender soil conditions.

I READY TO ROLL IN ANY CONDITION

REMOTE BROUWER TELEMATICS

Designed for easy maintenance and low OEM parts costs via our global dealer network, the RoboMax JD also takes advantage of Brouwer Telematics, allowing for remote diagnostics, updates, adjustments and monitoring utilizing GSM/GPS communication. Less down time means you experience fewer interruptions in your harvesting production.

10 PRESET STACK CONFIGURATIONS | 16", 23" & 24" CUTTING WIDTHS

The adjustable pallet injector can stack up to 18 pallets of various sizes and accommodate extra thick double-sided pallets. With adjustable stacking pressure, up to 5 rolls of turf are transferred to the rear mounted pallets and stacked in both flat or pyramid tops while the automatic flap control maintains roll & flap position. Pallets may be dropped on the go or easily backed out of the way of the cut line for multi-machine operations.
